* Comment. As compared with the last reported period, the total loading performance of the East German Railroads increased, probably because of harvest shipments. The number of freight cars required by the Soviets also increased, particularly during the period from 26 through 28 August. This increase was probably caused by field exercises held in the Berlin area and entraining for exercises in other districts.

Com ent. This information breaks down the freight cars made available for the Soviets according to individual railroad districts.
